

To: Willis Phillips Jr. (Room Don't know)

Dear Bill -- I just heard from your friend Rea that you're in the hospital and will get a heart catheterization procedure on Monday. I was very sorry to learn that, but I know the procedure has become very common and is considered routine. I've known several people who had it (including the former

Dodger manager Tom LaSorda), and all became stronger and more comfortable afterward. I'm confident it will also go well for you, and look forward to many, many more years of our already very longtime friendship. Your fellow Muskrat, tom
